

California Institute of Technology
Certificate of Training for Use of Radioactive Materials

Name of Radiation Worker

Name of Instructor (Authorized by Principal Investigator)

- Safe use of laboratory equipment and materials, including protective clothing*
- Experiment procedures and protocols*
- Safe handling, storage, and disposal of radioactive materials*
- Methods to control and measure radiation levels and contamination*
- Proper maintenance of required records*
- Emergency procedures*

We certify that the radiation worker named above has been trained and instructed in the proper and safe use of radioactive materials by the instructor named above. The extent of this training and instruction is such that we are confident that the radiation worker is qualified to use radioactive materials as approved by the Radiation Safety Committee on permits to which the worker has been added as an authorized user. All of the topics checked above have been discussed.
