Radioactive Waste Disposal Guidelines

All Radioactive Waste must be segregated by half-life (<15, 15-90, >90 days)

- **SOLIDS**
  - Must NOT contain:
    - Lead
    - Excessive Amount of Liquid
    - Sharps / Needles
    - Hazardous Material
    - Radioactive Markings / Labels

- **LIQUIDS**
  - Caps must be securely in place

- **SCINTILLATION VIALS**
  - Keep waste in its tray or in a plastic bag
  - Identify Isotope and Activity

- **MIXED WASTE**
  - RSO Approval Required
  - Hazardous Waste Tag and Radioactive Waste Tag must be completed

Radioactive Waste Tag must be completed

Radioactive Waste that is improperly disposed will not be accepted for waste pickup. It will be left in the lab for decay at which time a member of the group will be responsible for repackaging the waste in the appropriate manner.
